Covid Review

*** A Narrative Unfolds ***

**Fifteen months later we're still in the grip
of a narrative unchallenged in the
mainstream consciousness**

If covid was about science, we would never have heard of a massive threat, never have gone into lockdown, never have been subjected to an experimental treatment

The page features the MailOnline logo and a navigation menu with categories like Home, News, U.S., Sport, TV&Showbiz, Australia, Femail, Health, Science, Money, Food, Travel, Best Buys, and Discounts. Below the navigation is an advertisement for 'Antiviral Face Masks UK' by Protecify, featuring a blue face mask and a button labeled 'OPEN'. The main article headline reads: 'Professor Lockdown stands by doomsday forecast that sent Britain into lockdown: Warning of half a million deaths was an 'underestimate', admits Neil Ferguson'. Below the headline are two bullet points: 'Professor Neil Ferguson was a member of SAGE until dramatic resignation in May' and 'Imperial College epidemiologist said he was not in favour of lockdown to begin'. A search bar is visible at the bottom right of the article content.

When you were told, twice, about 500,000 deaths in the UK from Covid, that wasn't science. That was marketing.

When lockdown was imposed, it was already redundant and would be shown to have no effect. But it was highly effective for two reasons.

Backed by a media fear campaign and nuclear-warning style adverts every few minutes, it reinforced the threat.

It also conditioned the populace to wait for the all clear.

But who or what would be our saviour, allowing us to once more move freely outside our own homes?

Cue Bill Gates, April 5th, Fox News:
“It is fair to say, things won’t go back to truly normal until we have a vaccine that we’ve gotten out to basically the entire world.”

Normal life won't fully return until
COVID-19 vaccine developed,
Trudeau says

Within days that was the
official mantra declared by
the USA, Canada and United
Kingdom:

No normal till the vaccine.

Massive threat

Lockdown

Wait for the vaccine

Everything the public has
seen or heard has been
directed towards that
narrative:

Massive threat
Lockdown
Wait for the vaccine

Science, the government and the media have openly lied and committed fraud in the service of the narrative

Doctors, scientists, treatments, posts which challenge that narrative have been suppressed, often ruthlessly with jobs threatened or people actually fired.

Everything possible has been done to ensure the highest possible death count from covid.

The screenshot shows the BBC News website's Health section. The main headline is "Covid: Infections rising, but vaccines saving lives", dated 6 days ago. A secondary headline reads "UK infection up by more than 50% in a week - ONS", dated 9 hours ago. A third headline says "Keep using NHS Covid app people urged", dated 3 minutes ago. A photo shows a woman in profile, blowing a white nasal swab into a container. A caption below the photo states: "Covid infections are continuing to rise across the UK, Office for National Statistics (ONS) data suggests." The page also features a "Top Stories" section with a link to "Met PC pleads guilty to Sarah Everard murder" and a "Features" section with a video thumbnail of a man speaking.

Likewise there has been an overwhelming campaign to assure the public that the vaccines are safe.

And that you'll be saving lives, be responsible, by getting yours (and be allowed to travel again)

The issue isn't science.
It's marketing.

Until or unless you can
deprogram entire
populations, there will be
no end or release from the
new abnormal.

Legitimate science used to
that end is useful.

Arguing about the 'science'
of covid without addressing
and countering the
narrative is a distraction.

Everything you see or hear has to be filtered through the lens of a deceit and fraud that has been supported ruthlessly by every arm of the state.

If you hadn't noticed, the UK has just assured us they are 'opening up' even as they passed a law that can now earn you ten years in jail for protesting.

For me, fifteen months of challenging the narrative later, it's time to pay the bills. I do not have the leisure of being paid to lie to the public.
